

Who in their right minds would want to allow a few media conglomerates to control the media? I question those people and who is actually behind them and their motives. Terrorists are not as big a threat to this country as a misused and controlled media might be. We have all seen or been victims of less control by the S.E.C. now the F.C.C. proposes the same calamity. Any world power throughout history has been eroded from the inside not by terrorists from the outside.
